STAYING SAFE > FACE SHIELDS

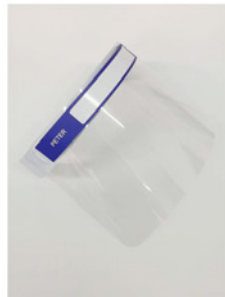

Face shield personal protective equipment are used by many workers for protection of the facial area (e.g. Industrial, medical, Food) and protect (eyes, nose, mouth) from any harmful matter. During the COVID19 crisis wearing a visor could help further prevent the spread of the virus.

For key workers; it could well become mandatory to wear these in the coming months.

Our masks are a durable product that can be used for **Industrial, Medical, Retail, Security, Personal Application** and can be customized with a company logo.
